Growing and Change

Nursery Knowledge Organiser

(Links to NC Science)

Key objectives (taught but not limited to)…

- To introduce the vocabulary for the season of Spring
- To plant seeds and care for them over time
- To observe growth, decay and change over time (growing beans)
- To explore collections of materials and talk about the changes they notice – cooking
- To explore different habitats outside (minibeasts, birds, make a wormery)

Key knowledge

- Spring is a season in the year
- Seeds can be planted and will grow into plants over time
- Seeds need water, warmth and light to grow
- Some materials change when they are heated up or cooled down
- Animals live in different places

Key vocabulary	Definition
Spring	A season in the year
grow	When something changes in size
change	When something becomes different over time
